FOUR WOUNDING SHOTS

THROAT · JFK		HEAD · JFK	
Z-184		Z-311	
186		bullet is fired from southWESTern window on TSBD's sixth floor	
187		312	
188		bullet en route on flight path above and behind limousine	
189		a body at rest, it left to itself, will maintain its condition	
190		312/313 bullet enters top inclined head 1" rt of midline	
193		313	
196		head at max. forward position ... fragments exit up & forward ... other material 360° ...	
200		change in motion indicates forces of another body (bullet) ... to	
204		313/314 every force there is an equal and opposite reaction ...	
hit at Z-188, wave changes to fist reacting to poisoned flechette .... 189 to 204 = 1.11 secs		bullet's fwd force expended, explosion reverses head's direction, off-center hit spins head counterclockwise body follows down to left	
CHEST · JBC		314	
222		315	
225		316	
224		317	
225		back of head intact · avulsion is later	
226		318	
227		319	
228		320	

1st shot : ±Z-150/1 : TH-EM, the Hard-Evidence man, using a Carcano in TSBD's window VI # 1, fires first of two rounds;
±Z-155 : bullet scars Main's PAVEMENT (a concrete particle wounds Tague's CHEEK) ricochets off south CURB into Commerce tunnel; to date it is unrecovered.

2nd shot : ±Z-158 : Santana, using another Carcano, in D-TB's window VII # 1, fires first of two rounds;
±Z-160 : bullet scars Elm's PAVEMENT, ricochets into RR yard, south of overpass; discovered by Lester 11 yrs later.

3rd shot : Z-187/8: Novel, standing near Stemmons on Grassy Knoll with umbrella-disguised Overhead Flechette Launcher at Ready, over his head (sunny, 68°F) launches a poison-carrying, needle-nosed mini-rocket (dart):
(see Willis 5 at Z-202 for The Umbrella Man's position; also Bronson 1 at Z-225)
Z-188 : La Flechette enters President's THROAT above shirt-collar, below Adam's apple; impaled on the spine it was removed by enlarging tracheotomy incision during pre autopsy examination

4th shot : ±Z-217/8: Santana fires second round;
±Z-220 : bullet enters President's BACK and hits spine; removed at pre-autopsy examination, CE 399 was substituted for it and the FBI gave a receipt for the "missle" (GKG, VIII/81)

5th shot : ±Z-220 : TH EM fires second round.;
±Z-221/2: bullet causes dent in limo's windshield frame between visors (CE 349); fragments recovered from front seat (CE 567) and adjacent floor (CE 569)

6th shot : Z-221/2 : Seymour, using a Mauser in TSBD's window VI # M, fires first of two rounds;
±Z-222 : bullet scars TWIG, deflects right,
Z-223 : traverses Governor's CHEST, WRIST and limousine's FLOOR (CE 346); limo's remodelling insures avoidance of discovery; particles from wrist removed at Parkland (CE 842)

(note: revision I mentioned by Lifton research re: limo remodel + CE 399 and Lattimer's research re: arms rising similar to Governor's seen 6 frames after hit)

7th shot : ±Z-287 : Perez, using a .44 pistol behind a grassy Knoll retaining wall, fires a red-herring, diversionary distraction;
±Z-288/9 : bullet scars infield grass TURF; retrieval by "intelligence agent", ± 1240, insured avoidance of discovery; puff of smoke lingers a while (Holland + 7 on Underpass, Moorman, Hill)

8th shot : Z-311 : Seymour fires second round;
Z-312/3: bullet traverses top of President's HEAD, escapes Dealey Plaza; fragments scar WINDSHIELD (CE 350, scrapings CE 841) enter Governor's THIGH (CE 696 is still there) and were recovered from under jumpseat (CE 840); fragments also removed from Head at autopsy (CE 843) ....
(7 seconds after La Flechette's poisoning, the Head Shot was the coup de grace.)

notes : wound of entry on the THROAT can only be inflicted ± Z-188 from a position limo-side of Stemmons;

there is no position in Dealey Plaza from which a bullet could inflict a wound of entry on the HEAD after Z-312/3 and produce the reaction seen on film

this drawing supercedes drwg # 10 - R E Sprague's Crossfire 70 and Crossfire 80 in GKG - VIII-81. also issue of this drawing, VII-1-81, and TF's positions JBC in TUM Fig 28

conspirator's names are underlined anyone with names for TH-EM and Z more on VI 2...
